

St Aloysius College (Autonomous)
Mangaluru

Re-accredited by NAAC “A” Grade
Course structure and syllabus of
B.Sc.
BOTANY

Under NEP Regulations, 2021

Re-accredited by NAAC with 'A' Grade with CGPA 3.62/4
Recognised by UGC as "College with Potential for Excellence"
Conferred "College with "STAR STATUS" by DBT, Government of India.
Centre for Research Capacity Building under UGC-STRIDE

Date: 21-02-2022

NOTIFICATION

Sub: Syllabus of **B.Sc. BOTANY** under NEP Regulations, 2021.
(As per Mangalore University guidelines)

Ref: 1. Decision of the Academic Council meeting held on 18-12-2021 vide
Agenda No: 6 (2021-22)
2. Office Notification dated 21-02-2022

Pursuant to the above, the Syllabus of **B.Sc. BOTANY** under NEP Regulations, 2021 which was approved by the Academic Council at its meeting held on 18-12-2021 is hereby notified for implementation with effect from the academic year **2021-22**.

PRINCIPAL

REGISTRAR

To:

1. The Chairman/Dean/HOD
2. The Registrar Office
3. Library

A meeting of the Board of Studies in BOTANY was held on 19 – 11 – 2021 (Online)

Members present:

External Members :

Vice Chancellor nominee -

1. Dr Raju Krishna Chalannaver - Professor, Department of Applied Botany, Mangalore University

Subject Experts -

2. Dr Giby Kuriakose - Asst Professor ,PG Dept of Botany, Sacred Heart College, Thevara, Kochi, Kerala
3. Dr Vijayalaxmi C Bhat - Asst Professor, Dept of Botany, Poorna Prajna College, Udupi

Meritorious Alumnus

4. Dr Madhumathi B. S - Programme Manager, Perfect Day India Pvt. Ltd, Electronic City, Bangalore

Internal Members :

1. Dr Jyothi Miranda, Chairperson & HOD
2. Ms Shilpa B
3. Dr Sana Sheik

Ms Akshitha Ramachandra Amin

PREAMBLE

St Aloysius College is named after St Aloysius Gonzaga. It is a Jesuit premier institute in Mangaluru, Karnataka, known for its rich heritage and quality education with a history of 140 years. The institution over the years has trained thousands of young men and women preparing them for life and presenting them to the nation. The institution has been able to redefine and reinforce the purpose of various innovations that have been initiated every year. The College has set high expectations and goal for all its learners and then tries in every possible way to help them to reach those goals. The College affiliated to Mangaluru University, was granted Autonomous status in the year 2007-2008.

In the field of Biological sciences, at the undergraduate level, the optional Botany has carved a niche from times immemorial. Many subjects like Biotechnology, Pharmacognosy, Microbiology, and Biochemistry have got their contributions and share from the traditional subject Botany. Botany with its strong fundamentals can only make the allied combinations more meaningful, fruitful and complete. In this context St Aloysius College has designed the course content of Botany to meet the needs of the present day students and enable them to join jobs, higher studies and research.

PROGRAMME SPECIFIC OUTCOMES:

On Completion of this Course students will be able to

- get an opportunity in further studies, research and employment in various areas of plant sciences.
- receive the updated subject matter, both theoretical as well as practical, such a way to foster their core competency, creative thinking and analytical learning . A botany graduate as envisioned in this framework would be sufficiently competent in the field to undertake further discipline-specific studies, as well as to begin domain-related employment.
- enhance their knowledge in the field of life sciences and are able to handle laboratory equipments and experimentation for higher education leading to research
- become a responsible citizen who is aware of the most basic domain-independent knowledge, including critical thinking and communication.
- enhance the scope of employability by obtaining all-round knowledge in the allied subjects along with Botany.
- develop an awareness towards the environment, biodiversity, conservation and their significance.
- promote and popularize the study of Botany for its importance and its social relevance
- equip themselves for competitive examinations enabling the graduates to prepare for national as well as international competitive examinations, including UGC-CSIR NET and UPSC Civil Services Examination.
- inculcate an interest for nature and the need to preserve the nature by maintaining greenhouse, herbal gardens in the campus and environs

Programme structure for the under-graduate programs in Universities and Colleges

SEMESTER-I								
Group	Course Code	Title of the Course	Instruction Hours / week	Duration of Exam (Hours)	Marks			Credits
					IA	Exam	Total	
Discipline Specific Course	G 507 DC1.1	MICROBIAL DIVERSITY AND TECHNOLOGY	4	2.5	40	60	100	4
Discipline Specific Course	G 507 DC 2.1P	MICROBIAL DIVERSITY AND TECHNOLOGY - PRACTICALS	4	3	25	25	50	2
Open Elective Course	G 507 OE 1.1	PLANTS FOR HUMAN WELFARE	3	2.5	40	60	100	3

[subjects with practicals] [With major Botany]

SEMESTER- II								
Group	Course Code	Title of the Course	Instruction Hours / week	Duration of Exam (Hours)	Marks			Credits
					IA	Exam	Total	
Discipline Specific Course	G507 DC1.2	DIVERSITY OF NON-FLOWERING PLANTS	4	2.5	40	60	100	4
Discipline Specific Course	G507DC 2.2P	DIVERSITY OF NON-FLOWERING PLANTS - PRACTICALS	4	3	25	25	50	2
Open Elective Course	G 507 OE 1.2	PLANT PROPAGATION, NURSERY MANAGEMENT AND GARDENING	3	2.5	40	60	100	3

B.Sc. BOTANY: Semester – I

G507 DC1.1: Microbial Diversity and Technology

Number of Theory credits: 4 Number of lecture hours/ week : 4 Number of Practical Credits : 2 Number of practical hours / week : 4

Course Outcomes:

At the end of the course the student should be able to:

- ❖ understand the fascinating diversity, evolution, and significance of microorganisms.
- ❖ comprehend the systematic position, structure, physiology and life cycles of microbes and their impact on humans and environment.
- ❖ gain laboratory skills such as microscopy, microbial cultures, staining, identification and preservation of microbes.
- ❖ apply microbes in research and industry

Course content **56 Hrs**

Unit 1 **14 Hrs**

1.1 Microbial diversity: Introduction to microbial diversity; Hierarchical organization and positions of microbes in the living world: Whittaker's five-kingdom system and Carl Richard Woese's three-domain system. Habitats of microbes : soil, air, food and water. Significance of microbial diversity .

1.2 History and development of microbiology: Microbiologists and contributions of - Leeuwenhoek, Louis Pasteur, Robert Koch, Joseph Lister, Dmitri Iwanowski, Sergius Winogradsky and M W Beijerinck and Paul Ehrlich.

1.3 Microscopy: Working principle and applications of light, dark field, phase contrast and electron microscopes (SEM and TEM).

1.4 Microbiological stains : acidic, basic and special and Principles of staining. Simple, Gram's and differential staining.

Unit II **14 Hrs**

2.1 Culture media for Microbes: Natural and synthetic media, Routine media -basal media, enriched media, selective media, indicator media, transport media, and storage media.

2.2 Sterilization methods :Methods of disinfection: antiseptic, tyndallization and Pasteurization. **Sterilization-Physical methods:** dry heat, moist heat, UV light, ionization radiation, filtration. Chemical methods - phenolic compounds, anionic and cationic detergents.

2.3 Microbial Growth:Microbial growth and measurement. Nutritional types of Microbes- autotrophs and heterotrophs, phototrophs and chemotrophs; lithotrophs and organotrophs.

Unit III

14 Hrs

3.1 Microbial cultures and preservation: Microbial cultures. Pure culture and axenic cultures, subculturing. Preservation methods-overlaying cultures with mineral oils, lyophilisation. Microbial culture collections and their importance. A brief account on ITCC, MTCC and ATCC.

3.2 Viruses: General structure and classification of Viruses; ICTV system of classification. Structure and multiplication of TMV, SARS-COV-2, and Bacteriophage (T2). Cultivation of viruses. Vaccines and types. Economic importance of viruses. **Viroids & Prions:**Viroids- general characteristics and structure of Potato Spindle Tuber Viroid (PSTVd); Prions - general characters and diseases.

3.3 Bacteria: General characteristics and classification.(Bergey's classification) Archaeobacteria and Eubacteria. Ultrastructure of Bacteria; Bacterial growth and nutrition. Reproduction in bacteria- asexual and sexual methods. Study of *Rhizobium* and its applications. A brief account of Actinomycetes , Mycoplasmas and Phytoplasmas - General characteristics and diseases

Unit IV

14 Hrs

4.1. Fungi:General characteristics and classification (Alexopoulos classification). Thallus organization and nutrition in fungi. Reproduction in fungi (asexual and sexual). Heterothallism and parasexuality. Type study: Morphology of *Rhizopus*, *Saccharomyces*, *Penicillium* and *Puccinia*. Morphology and reproduction of *Puccinia* Economic importance of Fungi.

4.2. Symbiotic associations:

Lichens – Structure- brief account of Crustose, foliose and fruiticose and asexual reproduction .

VAM Fungi and their significance.

4.3 Microbial plant diseases- Koleroga of Arecanut, Blast Disease of Rice; Black stem rust of wheat;Red rot of sugarcane , Sandal Spike, Citrus Canker, Root Knot Disease of Brinjal.

Practical Course G 507 DC 2.1P: Microbial Diversity and Technology

List of Experiments to be conducted

Practical 1: Safety measures in microbiology laboratory and study of equipment/appliances used for microbiological studies (Microscopes, Hot air oven, Autoclave/Pressure Cooker, Inoculation needles/loop, Petri plates, Incubator, Laminar flow hood, Colony counter, Haemocytometer, Micrometer.

Practical 2: Preparation of culture media (NA/PDA) sterilization, inoculation, incubation of *E coli* / *B. subtilis*/ Fungi and study of cultural characteristics.

Practical 3: Enumeration of soil/food /seed microorganisms by serial dilution technique.

Practical 4: Preparation of agar slants, inoculation, incubation, pure culturing and preservation of microbes by oil overlaying.

Practical 5: Determination of cell count by using Haemocytometer and determination of microbial cell dimension by using Micrometer.

Practical 6: Simple staining of bacteria (Crystal violet /Nigrosine blue) / Gram's staining of bacteria

Practical 7: Isolation and study of morphology of *Rhizobium* from root nodules of legumes

Practical 8: Preparation of spawn and cultivation of paddy straw (Oyster) mushroom.

Practical 9: Study of vegetative structures and reproductive structures of any six of the following: *Albugo* ,*Phytophthora*, *Rhizopus*, *Saccharomyces*, *Neurospora*/ *Sordaria*, *Puccinia*, *Agaricus*, *Lycoperdon*, *Aspergillus*/*Penicillium*, *Trichoderma*.(Depending on local availability)

Practical 10: Study of Koleroga of Arecanut, Blast Disease of Rice; Black stem rust of wheat, Red rot of sugarcane , Sandal Spike, Citrus Canker, Tobacco mosaic virus, Root Knot Disease of Brinjal.

Practical 11: Study of well-known microbiologists and their contributions through charts and photographs.

Practical-12: Visit to water purification units/Composting/ microbiology labs/dairy and farms to understand role of microbes in day today life. Field study report is to be documented in the practical record only.

**B.Sc. BOTANY: Open Elective Course
I Semester**

G 507 OE 1.1: Plants for Human Welfare

Course Outcomes:

On completion of this course, the students will be able to

- gain knowledge on the economic importance of diverse plants that offer resources to human life.
- know about the plants used as food, medicinal value and also plant sources of different economic value .
- understand the importance of plants in today's life, conservation, ecosystem and sustainability.

Number of Theory Credits	Number of lecture hours/semester	Number of practical Credits	Number of practical hours / semester
3	30	0	00

30 Hrs

Unit I

Origin of Cultivated Plants. Concept of Centres of Origin, their importance with reference to Vavilov's work. Examples of major plant introductions. Crop domestication and loss of genetic diversity (Only conventional plant breeding methods). Importance of plant bio- diversity and conservation. 02

Unit II

Wheat and Rice (origin, evolution, morphology, post-harvest processing & uses).Green revolution. Brief account of millets and their nutritional importance. 03

Unit III

Legumes: General account (including chief pulses grown in Karnataka- red gram, green gram, chick pea, soybean). Importance to man and ecosystem. 02

Unit IV

Fruits: Mango,grapes and Citrus (Origin, morphology,cultivation ,processing and uses) 02

Unit V

Cash crops: Morphology, new varieties and processing of sugarcane, products and by-products of sugarcane industry. Natural Rubber –cultivation, tapping and processing. 03.

Unit VI

Spices: Listing of important spices, their family and parts used, economic importance with special reference to Karnataka. Study of fennel, clove, black pepper and cardamom. 03

Unit VII

Beverages: Tea, Coffee (morphology, processing & uses) 02

Unit VIII

Oils and fats: General description, classification, extraction, their uses and health implications; groundnut, coconut, sunflower and mustard (Botanical name, family & uses). Non edible oil yielding trees and importance as biofuel. Neem oil and applications. 02

Unit IX

Essential Oils: General account. Extraction methods of sandal wood oil, rosa oil and eucalyptus oil. Economic importance as medicine, perfumes and insect repellents. 02

Unit X

Drug-yielding plants: Therapeutic and habit-forming drugs with special reference to Cinchona, Digitalis, *Aloe vera* and Cannabis. 03

Unit XI

Fibers: Classification based on the origin of fibers; Cotton and jute (origin morphology, processing and uses). 03

Unit XII

Forests: Forest and forest products. Community forestry. Concepts of reserve forests, sanctuaries and national parks with reference to India. Endangered species and red data book. 03

B.Sc. BOTANY: Semester – II

G507 DC1.2: Diversity of Non- Flowering Plants

Number of Theory credits: 4 Number of lecture hours/ week: 4 Number of Practical Credits : 2 Number of practical hours / week :4

Course Outcomes:

At the end of the course the student should be able to:

- ❖ understand the diversity and affinities among Algae, Bryophytes, Pteridophytes and Gymnosperms.
- ❖ understand the morphology, anatomy, reproduction and life cycle across Algae, Bryophytes, Pteridophytes and Gymnosperms.
- ❖ understand the ecological and evolutionary significance.
- ❖ obtain laboratory skills/explore non-flowering plants for their commercial applications.

Course content

56 Hrs

Unit 1

14 Hrs

1.1 Algae: Introduction and historical development in algology. Distribution of Algae. General characteristics, classification of algae by Fritsch. Diversity- habitat, thallus organization, and alternation of generation in Algae.

1.2 Morphology and reproduction and life-cycles of *Nostoc*, *Oedogonium*, *Chara*, *Sargassum* and *Polysiphonia*. Diatoms and their importance.

1.3 Algal cultivation: a general account. Basic cultivation techniques of microalgae. Algal products- Food and Nutraceuticals, Feed stocks, food colorants; fertilizers, aquaculture feed; therapeutics and cosmetics; medicines; dietary fibres from algae. Algal blooms and toxins.

Unit II

14 Hrs

2.1 Bryophytes – General characteristics and classification (Rothmaler) of Bryophytes.

2.2 Distribution, morphology, anatomy, reproduction and life-cycles of *Riccia*, *Anthoceros*, and *Funaria*. Ecological and economic importance of Bryophytes

2.3 Pteridophytes- General characteristics and classification (Smith); Distribution, morphology, anatomy, reproduction and life-cycle in *Selaginella*, *Pteris* and *Marselia*.

Unit III

14 Hrs

3.1. Brief account of heterospory and seed habit. Stellar evolution in Pteridophytes . Affinities and evolutionary significance of Pteridophytes. Ecological and economic importance.

3.2. Gymnosperms- General characteristics. Distribution and classification of Gymnosperms (Sporne). Study of the habitat, habit, anatomy, reproduction and life-cycle in Cycas, Pinus and Gnetum.

3.3. Affinities and evolutionary significance of Gymnosperms. Economic importance of Gymnosperms - food, timber, industrial uses and medicines

Unit IV

14 Hrs

4.1 Origin and evolution of Plants: Origin and evolution of plants through Geological Time scale.

4.2 Paleobotany: Paleobotanical records, plant fossils, Types of plant fossils - impressions, compressions, incrustation, actual remains petrification. Radiocarbon dating. A general account of fossil Bryophytes

4.3 Fossil : Fossil taxa- *Rhynia*, *Lepidodendron*, *Cycadeoidea*. Contributions of Birbal Sahni. Birbal Sahni Institute of Paleosciences.

Practical Course G 507 DC 2.2P : Diversity of Non- Flowering Plants

List of Experiments to be conducted

Practical-1: Study of morphology, classification, reproduction and lifecycle of *Nostoc*, *Oedogonium*.

Practical-2: Study of morphology, classification, reproduction and life-cycle of *Chara*, *Sargassum*, *Polysiphonia*

Practical -3: Study of important blue green algae causing water blooms in the lakes.

Practical-4: Study of morphology, classification, reproduction and life-cycle of *Riccia*/*Anthoceros*.

Any one locally available moss.

Practical-5: Study of morphology, classification, anatomy, reproduction and life-cycle of *Selaginella*.

Practical -6: Study of morphology, classification, anatomy, reproduction and life-cycle of *Pteris* and *Marselia*.

Practical -7: Study of morphology, classification, anatomy and reproduction in *Cycas*.

Practical -8: Study of morphology, classification, anatomy and reproduction in *Pinus*.

Practical -9: Study of morphology, classification, anatomy and reproduction in *Gnetum*.

Practical -10: Study of important ornamental ferns.

Practical -11: Preparation of natural media and cultivation of *Azolla* in artificial ponds.

Practical -12: Media preparation and cultivation of *Spirulina*.

Practical -13: Study of different algal products and fossils impressions and slides.

Practical-14: Visit to algal cultivation units/lakes with algal blooms/Fern house/Nurseries/Geology museum/lab to study plant fossils and the report is to be documented in the practical record.

B.Sc. BOTANY: Open Elective Course

II Semester

G 507 OE 1.2: Plant Propagation, Nursery Management and Gardening

Course Outcomes:

On completion of this course, the students will be able to

- ❖ gain knowledge of gardening, cultivation, multiplication, raising of seedlings of garden plants.
- ❖ get knowledge of new and modern techniques of plant propagation.
- ❖ develop interest in nature and plant life.
- ❖ understand the application of this field in floriculture, agriculture and medicine
- ❖ practice sustainable use of plant resources

Number of Theory Credits	Number of lecture hours/semester	Number of practical Credits	Number of practical hours / semester
3	30	0	00

30 Hrs

Unit I

Nursery: Definition, objectives and scope and general practices and building up of infrastructure for nursery, planning and seasonal activities. Planting - direct seeding 04 and transplants, Soil free/soilless/ synthetic growth mediums for pots and nursery.

Unit II

Seed: Structure and types - Seed dormancy; causes and methods of breaking 06 dormancy. Seed storage: Seed banks, factors affecting seed viability, genetic erosion Seed production technology. Seed testing and certification.

Unit III

Vegetative propagation: Air-layering, cutting, selection of cutting, collecting season, treatment of cutting, rooting medium and planting of cuttings. Hardening of plants. Green house, mist chamber, shed root, shade house and glass house. 06

Unit IV

Gardening: Definition, objectives and scope. Different types of gardening - landscape and home/terrace gardening, parks and its components. Plant materials and design. Computer applications in landscaping, Gardening operations: soil laying, manuring, watering, management of pests and diseases and harvesting. 08

Unit V

Sowing/raising of seeds and seedlings - Transplanting of seedlings - Study of cultivation of different vegetables and flowering plants: cabbage, brinjal, lady's finger, tomatoes, carrots, bougainvillea, roses, geranium, petunia, orchids etc. Storage and marketing procedures. Developing and maintenance of different types of lawns. Bonsai technique. 06

SCHEME OF ASSESSMENT	
Ratio of weightage (marks) between Internal & End Semester Examinations for THEORY: 60:40 Practicum component marks: 50	
Internal component of practicum: 50 (converted to 25)	
Assessment Type	Weightage in marks
Continuous Assessment of all practical experiments	15
Attendance	05
Model practical Test	20
Maintenance of Records	05
Viva	05
End semester Practicum : 50 (converted to 25)	
THEORY FORMATIVE ASSESSMENT: 40	
Assessment Type	Weightage in marks
Two internal tests	10×2=20
Assignment	05
Attendance	05
Continuous Unit wise tests (objective/MCQ)	05
Group/ teams of two projects:	05
THEORY SUMMATIVE ASSESSMENT: 60	

QUESTION PAPER PATTERN: DC & OE

Time: 2.5 HRS

Max Marks: 60

Part – A

1) Answer Any Five of the following
(Five to be answered out of eight)

5X2 =10

Part – B

2) Answer Any Six of the following
(Four to be answered out of eight)

6X5=30

Part-C

3) Answer any Two of the following
(Two to be answered out of Four)

2X10=20

Question Paper will have Three Parts –**A, B, C**

Part A- Eight Questions from four units with equal weightage

Part B- Eight Questions from four units with equal weightage

Part C- Four questions from four units with equal weightage

**QUESTION PAPER PATTERN: [PRACTICALS]
DC-2.1 P Microbial Diversity and Technology**

Time: 3HRS

Max Marks: 50

1. Identify the given Material **A**. Leave the preparation for inspection **6**
(Preparation-3, Labelled diagram-2, Identification with classification-1)

2. Identify **B, C** and **D** with Labelled sketch and Reasons 3x4=12

(Labelled Sketch = 1, Classification = ½, Identification ½ , Reasons =2)

3. Perform gram staining from the given sample **E** 8
(Principle- 2, Slide Preparation- 3, Procedure-2, Result-1)

4. Write Critical Notes on **F,G,H** and **I** 4x3=12
(Identification =1, Critical notes=2)

5. Determine the cell dimension of the given microbial cell using micrometer 8
(Performance- 2, Procedure-3 , Calculation & Result- 3)

6. Write a note on contributions of the given scientist **J** 4

Note to the Examiners

1. Specimen **A** (fungus)
2. Specimen **B, C** and **D** – from microfungi
3. Gram +/- **E**
4. Critical notes **F , G, H** and **I** - macroscopic specimens from viral diseases/ bacterial diseases/ mycoplasmal diseases / fungal diseases
5. Cell dimension of fungal spores
6. Contribution of any Microbiologist.

QUESTION PAPER PATTERN: [PRACTICALS]

DC -2.2 P Diversity of Non- Flowering Plants

MAX MARKS: 50

TIME: 3 HR

1. Prepare a Temporary mount of material **A**. Identify and leave the preparation for inspection. **5**
(Preparation-2, labelled sketch -2, identification -1)
2. Prepare a Temporary mount of material **B** . Identify and leave the preparation for inspection. **6**
(Preparation-2, labelled sketch -3, identification -1)
3. Identify Material **C** and **D**. Leave the preparation for inspection **2X6=12**
(Preparation-3, Labelled sketch-2, Identification with classification-1)
2. Write Critical Comments on **E,F , G** and **H** **4X3=12**
(Identification- 0½, Reasons-2½)
3. Identify the given Slides **I, J, and K** **3X5=15**
(Identification-1, Labelled sketch- 2 , Reasons-2)

Note to the Examiners

1. Specimen **A** – Cyanobacteria / Algae
2. Specimen **B** - Bryophyte
3. Specimen **C and D** - Pteridophyte and Gymnosperm
4. Specimen **E, F, G** and **H**- one each from the above mentioned groups.
5. Specimen **I, J** and **K** – one each from the above mentioned groups.
