

# **Career opportunities in Finance and Analytics**

**Resource Person:** Mr. Rojer Mathew

Business Intelligence Services

Bendoorwell, Mangaluru, Karnataka 575002

**Date:** 11/05/2022

**Time:** 10am – 12pm

**Venue:** Computer Lab, Arrupe Block.

A guest lecture on Career Opportunities in Finance and Analytics was conducted by the Department of Post Graduates Studies and Research in Commerce (Finance and Analytics) of St. Aloysius College (Autonomous) Mangalore in association with Business Intelligence Services (BIS). The resource person for the session was Mr. Rojer Mathew, Proprietor, Business Intelligence Services. He was an alumnus of St. Aloysius College (Autonomous) Mangalore currently providing coaching classes to students in Data Analytics in the field of Commerce. Mr. Joyan D Souza, HOD, MCom Finance and Analytics welcomed the gathering and introduced the guest to all the participants.

Under this guest lecture the resource person discussed about the various career opportunities available for M.com freshers in data analytics. He also mentioned about the various job responsibilities and skills associated with the particular job in the field of finance and data analytics and that one should try honing those skills to be a better candidate for selection. He enlightened students about specific jargons and methods to be used while searching for jobs on internet which will provide the users with the right job(s) they are searching for.

Mr. Rojer elaborated on various fields and opportunities available to MCom graduates to choose from besides being bound to the teaching field. Even the fresh MCom graduates can excel in data analysis such as Enterprise Resource Planning (ERP) as the coming age will be filled with

technology and business-related opportunities. He gave a brief information about how to maintain a good resume for increasing the chances of getting hired.

He presented us with an ERP software which included various departments of a company which he was working with. It had several other heads incorporated under the said departments. He explained to the students how the debit and credit system work as per the ERP software and also said that besides these Data Analytics softwares there are certain programming languages used in financial analytics such as Python and R Programming. Finally, he provided us with a great opportunity to begin training under him for a time period of 3 months and later on with our proficient skills giving us internship opportunities.

In conclusion, this guest lecture was very useful for all the students and got the best of information about data analysis in the field of finance and commerce and various opportunities for M.Com freshers within a short period of time. The resource person has the vast knowledge about the topic and he explained it very well. The session ended with a vote of thanks proposed by Dr. Shakira Irfana, Assistant Professor, M.Com (Finance & Analytics).
