Programme Objectives:

The objectives of BBA Programme are:

- To impart knowledge of the fundamentals of Management theory and its application in problem solving.
- Select and apply appropriate tools for decision making required for solving complex managerial problems.
- To develop problem-solving skills through experiential learning and innovative pedagogy to ensure utilization of knowledge in professional careers.
- To develop sound knowledge of the entrepreneurial process and inculcate creativity and innovation among students.
- To produce industry ready graduates, have highest regard for Personal & Institutional Integrity, Social Responsibility, Teamwork and Continuous Learning.
- To develop a positive attitude and life skills to become a multi-faceted personality with a sense of environmental consciousness and ethical values.

PROGRAMME OUTCOMES (PO):

On successfully completing the program the student will be able to:

P01: Understand concepts and principles of management/business; identify the opportunities in the corporate environment and manage the challenges.

PO2: Demonstrate the knowledge of management science to solve complex corporate problems using limited resources. Display enhanced personality and soft skills.

PO3: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO4: Demonstrate entrepreneurial competencies.

PO5: Exhibit managerial skills in the areas of marketing, finance, HR, etc.

PO6: Identify business opportunities, design and implement innovations in workspace.

P07: Possess a sturdy foundation for higher education.

PROGRAM SPECIFIC OUTCOMES (PSO):

On the successful completion of B.B.A., the students will be able to:

PSO1: Acquire practical learning through summer internship, industrial visit and Business Plan etc.

PSO2: Demonstrate analytical and problem-solving skills through specialization in Finance, Human Recourse, and Marketing to solve the business issues.

PSO3: Understand and develop the new dimensions of knowledge through open electives to cater the need of the industry.

PSO4: Comprehend the core concepts, methods and practices in management.

PSO5: Venture into his/her own business or excel in executive roles in private/government sector.

PSO6: Demonstrate the ability to create business plans.

PS07: Develop an understanding of business that reflects the moral responsibility of business to all relevant stakeholders and the natural environment.

PSO8: Matured Individuals and responsible Citizens to the country.

PSO9: Demonstrate Ability to work in Groups.

Note: Students have to do Internship in Business Organization between V and VI Semester holidays for three weeks.

A. INTERNSHIP WITH BUSINESS ORGANIZATIONS

Objectives:

- \cdot To enhance the classroom learning
- · To provide training and experiential learning opportunities for students

 \cdot To provide an opportunity to apply knowledge and skills acquired by the students in the classroom to professional context

Guidelines to the institution:

1. Each student will have to work in a Business Organization for three weeks during the vacation between fifth and sixth semester.

2. The entire batch of students to be divided equally among the department faculty members. The faculty members should be the mentors and guide the students in internship process.

3. The students must submit the Certificate for completion of internship by the organization to the college along with a brief report of not less than 25 pages. The report to contain a brief detail of the organization, nature of business, a write up on the learning outcome from the internship carried out by them.

Marks Allocation:

 \cdot 30 marks for the Internship Report and 20 marks for Presentation and Viva-Voce examination.

 \cdot Viva-Voce shall be conducted at the end of the semester, by the external faculty, from among the panel of examiners

and identified by the College.

 \cdot The Institution should send the marks to the University along with IA Marks scored by them in the VI Semester.

Module No. 5: OFFICE MECHANISATION AND DATA PROCESSING

09

Meaning, Importance and Objectives of Office Mechanisation, Advantages and disadvantages of Office Mechanisation, Factors Determining Office Mechanisation

Kinds of Office Machines: Duplicating Machines and Photocopying Machines, Accounting, tabulating and computing machines, communication machines

Introduction to Data and Information: Distinction between Data and Information, Importance of Data and Information, Data Collection Methods- Primary and secondary data collection methods Data presentation Methods of Presentation of Data

Data processing using computers: Components of Computers, Input and Output Devices,

Software used in Computers (names and uses only), Computer Applications in Office' Management, Advantages and Limitations of Computerisation

Skill Developments Activities:

- 1. Visit an office and enlist the different types of machines used in the office
- 2. Identify the different types of stationery used in offices today
- 3. Draw a data life cycle chart
- 4. Draw charts indicating different types of office layouts.

Name of the Course: Basic Economics (OEC)

Subject Code: G 401 OE 3.1

Corse credits: 3 No. of Hours per week: 3 Hrs

Total No. of Teaching Hours: 42 Hrs

TITLE OF THE PAPER: BASIC ECONOMICS (OE)

COURSE OBJECTIVES: To help students to acquire knowledge of some of the basic concepts, principles and

- theories of Micro Economics.
- To understand the consumer behavior in different market situations.
- To provide the foundation for the study of other branches of economics.

COURSE OUTCOMES:

- Explain how consumers make rational choices using the concept of utility
- To understand the concept of consumer surplus.
- Analyse the factors that affect market demand and market supply and illustrate their interaction for achieving equilibrium in price and quantity.
- Analyse how producer applies the marginal decision rule to maximize the profit in producing goods or services.

MODULE I: NATURE AND SCOPE OF BUSINESS ECONOMICS: 14 Hours

Chapter 1: Economics- Meaning, Definitions, nature of Economics, Human wants – meaning, features –types of human wants.

Chapter 2: Utility and Consumer Surplus: Utility –meaning –creation of utility –cardinal and ordinal utility –marginal and total utility –law of diminishing marginal utility –meaning

-explanation -importance -exceptions to the law - -the concept of consumer surplus.

Chapter 3: Indifference Curve – meaning, definition, -indifference map-Properties.

MODULE II: THEORY OF DEMAND AND DEMAND FORECASTING: 14 Hours

Chapter 4: Demand: Meaning of demand, Demand determinants, Law of demand, forces behind the demand curve - Exceptions to the law of demand.

Chapter 5: Elasticity of Demand: meaning, kinds, degrees of price elasticity of demand, income elasticity of demand and cross elasticity of demand.

Chapter 6: Demand Forecasting: Meaning, Methods of demand forecasting. Mathematical problems related to demand forecasting; Profit planning –importance of profit planning.

MODULE III: PRODUCTION AND SUPPLY ANALYSIS:

14 Hours

Chapter 7: Production Analysis: –Production and production function-meaning –factors –features –production possibility curve-mathematical problems -shifts in production

possibility curve-isoquant -properties.

Chapter 8: Supply Analysis: Supply meaning –determinants of supply –law of supply –elasticity of supply.

Chapter 9: Market Equilibrium: Concepts of Equilibrium - Stable and Unstable, Static and Dynamic, Partial and General Meaning of market, Forces determining the market price, market equilibrium-problems.

MANAGERIAL ECONOMICS (OEC)

Course Code: G401 OE 3.2

Course credits: 3

No. of Hours per week: 3 Hrs

Total No. of

Teaching Hours: 42 Hrs

TITLE OF THE PAPER: MANAGERIAL ECONOMICS (OE)

COURSE OBJECTIVES:

- To acquaint with the basic knowledge on the concept of managerial economics.
- To understand different market structures within which a firm operates.
- To enable the students to gain knowledge about the various tools, techniques and concepts of managerial economics.
- To understand the process of decision making by the consumers and producers.

COURSE OUTCOMES:

- To know the basic knowledge of managerial economics.
- To understand the dynamics of business.
- To know about the managerial concept of business
- Helps the consumers and producers to take apt decisions

MODULE -1: NATURE AND SCOPE OF MANAGERIAL ECONOMICS: 14 Hours

Chapter 1: Managerial Economics: Meaning, Definition of Managerial Economics -Nature and Scope of Managerial Economics, Role and responsibilities of a Managerial economist, Economics vs. Managerial Economics.

Chapter 2: Cost Analysis: Cost Concepts -Cost Output Relations - Short run and Long run cost curves. Mathematical problems.

Chapter 3: Revenue Analysis: Revenue: meaning, concepts: Total Revenue, Average Revenue and Marginal Revenue.

MODULE II: PERFECT COMPETITION:

14 Hours

Chapter 4: -Perfect Competition: meaning and features, Relationship between AR and MR under Perfect competition –Numerical illustration.

Chapter 5: Price and Output in Perfect Competition: Conditions of equilibrium, Determination of Equilibrium Price and Output - Industry and Firm -Numerical Illustrations, Price- Output Determination in the short run and long run under Perfect Competition **Chapter 6: Break Even Analysis:** Meaning of break even, assumptions, types, Usefulness, Limitations and Numerical Illustration.

MODULE III: IMPERFECT COMPETITION:

14 Hours

Chapter 7: Monopoly: Meaning of imperfect competition. Relationship between TR, AR and MR under imperfect competition. Monopoly: meaning, features, Equilibrium -short run and long run -Price Discrimination -meaning -essential conditions -Equilibrium under Price Discrimination -Price Discounts and Differentials –meaning

Chapter 8: Monopolistic Competition: Meaning-Features -Price Output Determination under Monopolistic Competition.

Chapter 9: Oligopoly: Meaning -Features of Oligopoly, Types of Oligopoly, Kinked Demand Curve Model.

| • The ability to prepare material re | equisitions and management of store | 2. |
| • The ability to compare and contr | ast labour /employee cost technique | es. |
| • Ability to differentiate kinds of o | werhead costing. | |
| • Ability to reconcile the cost. | | |
| Module No. 1: INTRODUCTION TO | COST ACCOUNTING | 12 HOURS |
| Introduction: Meaning, Objectives, Imp | portance and Uses of Cost Account | ting, Functions of |
| Cost Accounting Department in an Org | ganization, Difference between Co | st Accounting and |
| Financial Accounting, Various elements | of Cost and Classification of Cost; | Cost Object, Cost |
| Unit, Cost Driver, Responsibility Cent | ers; Cost Reduction and Cost Con | trol; Methods and |
| Techniques of Costing(Meanings only): | : Use of IT in Cost Accounting; L | imitations of Cost |
| | | |

Accounting: Cost Sheet: Meaning and Cost Heads in a Cost Sheet, Presentation of Cost information in Cost Sheet/Statement- Problems on Cost Sheet, Tenders and Quotations.

Module No. 2: MATERIALS COST

12 HOURS

Materials: Meaning, Importance and Types of Materials - Direct and Indirect Material. Materials Procurement: Procedure for procurement of materials and documentation involved in procurement of materials- (Bill of materials, Material requisition note, Purchase requisition note, Purchase order, Goods received note); Material Storage and Records: Duties of Store keeper, Store records- (Bin cards, Stores Ledger, Stock Control Cards); Material Issues and Valuation: Procedure for material issues, Documents used in material issues- (Material Requisition Note, Material Transfer Note, Materials Return Note); Valuation of material issues-preparation of Stores Ledger/ Account - FIFO, LIFO, Simple Average Price and Weighted Average Price Methods- problems.

Inventory Control: Inventory control techniques and determination of various stock levels-Problems on Level Setting and Computation of EOQ; ABC Analysis, FSN Inventory, VED Inventory, HML Inventory, Physical Control- Two-Bin system, KANBAN, JIT Inventory Management technique, Perpetual Inventory system (Concepts only).

| Module | No. | 3: | EMPLOYEE | COST | (LABOUR | COST) |
|----------|-----|----|----------|------|---------|-------|
| 10 HOURS | | | | | | |

Employee Cost: Meaning, Components, Classification and Importance of Employee (Labour) Cost in Organisations; Attendance Procedure-Time keeping and Time Booking Idle Time-Causes and treatment of Normal and Abnormal Idle Time, Overtime- Causes and treatment (Theory only);Methods of Remuneration (Payment of Wages and Incentives) Problems on calculation of earnings under Time Rate (Straight time rate, Halsey and Rowan Methods) and Piece rate systems (Straight piece rate and Taylor's differential piece rate); Employee Turnover Meaning, Reasons and Effects of LTO/ETO.

Module No. 4: OVERHEADS

12 HOURS

Overheads: Meaning and Classification of Overheads; Accounting and Control of Manufacturing Overheads: Estimation and Collection, Cost allocation. Apportionment, Re-apportionment and Absorption of Manufacturing Overheads; Problems on Primary and Secondary distribution and Secondary distribution using Reciprocal Service Methods only (Repeated Distribution Method and Simultaneous Equation Method); Accounting and Control of Administrative, Selling and Distribution overheads; Absorption of overheads: Meaning and Methods of Absorption of overheads; Problems on Machine hour rate

Module No. 5: RECONCILIATION OF COST AND FINANCIAL ACCOUNT 10 HOURS

Reasons for differences in Profits under Financial and Cost Accounts; Procedure for Reconciliation-Ascertainment of Profits as per Financial Accounts and Cost Accounts and Reconciliation of Profits of both sets of Accounts - Preparation of Reconciliation Statement - Problems.

Skill Developments Activities:

- Collection and classification of overheads of 2 industries.
- List out the materials used in 5 industries.
- Identify the cost elements of a product in a manufacturing unit.
- List the documents required in Inventory Management.
- Demonstrate the valuation of inventory using any one method of pricing material issues.

G 401. DC 2.3

Name of the Course: ORGANIZATIONAL BEHAVIOR

Course Credits -4 CreditsNo. of Hours per Week -4 HrsTotal No. ofTeaching Hours -56 Hrs

Pedagogy: Classrooms lecture, tutorials, and Problem Solving.

Course Outcomes:

On successful completion of the course, the Students will demonstrate:

• To recall role of OB in business organization.

- Able to understand group dynamics in an organization.
- Able to understand the change management.
- Able to construct the process of organizational development.
- Ability to understand the kinds of Interventions in OB.

Module No. 1: ORGANIZATIONAL BEHAVIOUR AND FOUNDATIONS OF

INDIVIDUALBEHAVIOUR

10 hrs

Organization Behavior– Meaning, Definition of OB, Importance of OB, Foundations of OB. Individual Behavior - Personal Factors, Environmental Factors, organization systems and resources Personality-Meaning, Nature, Determinants and Traits of Personality

Perception- Meaning, Factors influencing perception, Perceptual Process, Perceptual Errors, Managing Perceptions.

Module No. 2: GROUP AND TEAM DYNAMICS

8 hrs

Group Dynamics-meaning, Types of Group, Development of Groups- Stages of Group Development, Determinants of Group Behavior, Team Dynamics- meaning, Types of Teams: Conflict-sources of conflict and ways of resolving conflict, managing interpersonal relationships

Module No. 3: CHANGE MANAGEMENT 10 hrs

Introduction to Change Management: OD and Change, Importance and Nature of Planned Change; Theories of Planned Change - Action Research Model, Kurt Lewin's Change Model

Introducing Change Effectively: Basic steps, Factors Influencing Change - Resistance to Change, Overcoming Resistance to Change; Empowering People to Manage Change, Activities Contributing to Effective Change Management

Strategies for Effecting Change: Empirical–Rational strategies, Normative - Re-Educative Strategies of Changing, Power - Coercive Strategies (Meanings only).

Module No. 4: LEARNING & PERCEPTION

12 hrs

LEARNING & PERCEPTION Learning: Meaning, nature of learning, how learning occurs, principles of learning, learning and OB. Perception- Meaning, Nature and importance, Principles and factors in perception, Process of perception, Distortion in perception. Learning Outcome: To examine those elements of the cognitive process that contributes to employee behaviour.

Module No. 5: CONFLICTS, POWER AND POLITICS

16 hrs

Conflict-Intrapersonal, Interpersonal, Inter-group conflicts, Resolution of conflicts[TA, Life

position, Johari Window. Power-Definition, Dynamics, Types, Acquisition of power, Power tactics. Politics-Concepts, reasons for organisational politics, managing organisational politics. Learning Outcome: To explain the how organizational culture could result in Conflicts, acquisition of power and positive or negative politics.

Skill Developments Activities:

1. How leader make a difference - Case incident

2. Using personality Tests to improve communication- Case Incident 3. —I Love My Work∥ – Case Incident

4. Games people Play – Case Incident

Text Books:

1. Fred Luthans, Organizational Behaviour. McGraw Hill

2. Robbins, Organizational Behaviour, International Book House.

| Name of the Program: BBA | Course Code: G 401. DC 3.3 |
|---|----------------------------|
| Name of the Course: Statistics for Business Decisions | |

Pedagogy: Classrooms lecture, tutorials, and Problem Solving

Course Outcomes: On successful completion of the course, the Students will demonstrate

- To understand the requirements of statistical framework
- To construct and visualize the data.
- To determine the data adequacy for analysis.
- To Review the data by using various tools.
- To understand and analyze the impact of probability.

Module No. 1: INTRODUCTION TO STATISTICS 12 hours

Introduction — Meaning, Functions and Uses of Statistics; Collection of Data - Techniques of Data Collection — Census Technique and Sampling Technique (Concepts). Classification: Meaning, and Methods of Classification of Data, Tabulation: Meaning, Parts of a Table — Simple problems on Tabulation; Diagrammatic Presentation: Bar Diagrams — Simple Bars, Multiple Bars, Percentage Sub-divided Bar Diagram; Two Dimensional Diagrams — Pie Diagram.

Module No. 2: MEASURES OF CENTRAL TENDENCY AND DISPERSION 14 hours

Measures of Central Tendency: Calculation of Arithmetic Mean, Median and Mode for Individual, Discrete and Continuous Series — Problems; Empirical relation between Mean, Median and Mode.

Measures of Dispersion: Absolute and Relative measures of Range, Quartile deviation, Standard Deviation in Individual, Discrete and Continuous Series — Problems

Measures of Skewness: Calculation of Karl Pearson's (Uni-modal) and Bowley's Coefficient of Skewness

Module No. 3: CORRELATION AND REGRESSION ANALYSIS 10 hours

Correlation Analysis - Meaning, Types of Correlation, Calculation of Karl Pearson's Coefficient of Correlation, Computation of Probable Error, Spearman's Rank Coefficient of correlation problems. Regression Analysis — Concept of Regression, Regression equations-Problems

Module No. 4: TIME SERIES ANALYSIS 10 hours

Meaning, Components, fitting a straight-line trend using Least Square Method (Problems where EX=O only), calculation and estimation of trend values.

Module No. 5: INDEX NUMBERS 10 hours

Index number, Construction of Index number, Methods of Index number - simple aggregate method, Weighted method (Laspeyres, Paashes, Marshal - Edgeworth Fishers Ideal Index number). Tests of Adequacy (Unit test, TRT, FRT, Circular test, Consumer Price Index number

Skill Developments Activities:

- a) Data Visualization practical session Using Table/Power BI.
- b) Execute Average, Variance, Standard Deviation, CV, Covariance using Excel.
- c) Execute and Analyse Regression Model using Excel,
- d) Practical session on Time series models using GRETL
- e) Collect past years' Indian consumer price index data (as of the current base year) and analyse its impact on any macroeconomic indicator.

SEMESTER FOUR

Course Code: G 401 DC 1.4

Name of the Course: MANAGEMENT ACCOUNTING

| Course Credits | No. of Hours per Week | Total No. of Teaching Hours |
|-----------------------|-----------------------|-----------------------------|
| 4 CREDITS | 5 HOURS | 56 HOURS |

Pedagogy: Classrooms lecture, tutorials, and Problem Solving.

Course Outcomes: On successful completion of the course, Students will demonstrate:

- Able to understand the concept of Management Accounting.
- To Understand and recall ratios and apply the same on given case.
- To construct cash flow statement.
- Should be able to apply Marginal cost rations to make business decisions.
- Student should be able to analyze business problems through applications.

Module No. 1: INTRODUCTION TO MANAGEMENT ACCOUNTING 8 HOURS

Introduction- Meaning and Definition – Objectives – Nature and Scope-Functions- Role of Management Accountant, Relationship between Financial Accounting and Management Accounting, Relationship between Cost Accounting and Management Accounting, advantages and limitations of Management.

Module No. 2: RATIO ANALYSIS

Introduction-Meaning and Definition of ratio, Meaning of Accounting ratio, and Ratio Analysis – Uses and Limitations -Classification of ratios- Liquidity ratios, Profitability ratios and Solvency ratios. Problems on conversion of financial statements into ratios and Ratios into financial statements.

Module No. 3: CASH FLOW ANALYSIS

Meaning and Definition of Cash Flow Statement-Concept of Cash and Cash Equivalents – Uses of Cash Flow Statement – Limitations of Cash Flow Statement-Differences between Cash Flow Statement and Fund Flow Statement – Provisions of Ind. AS-7. Procedure for preparation of Cash Flow Statement-Cash Flow from Operating Activities – Cash Flow from Investing Activities and Cash Flow from Financing Activities – Preparation of Cash Flow Statement according to Ind. AS7.

Module No. 4: MARGINAL COSTING

Introduction-Meaning and definition of marginal cost, marginal costing, features of marginal costing- terms used in marginal costing – P/V ratio, BEP, Margin of Safety, Angle of

12 HOURS

12 HOURS

14 HOURS

Incidence and Break-Even Chart. Break Even Analysis- assumption and uses problems.

Decision Making-Make or Buy, Sales Mix Analysis, Profitability Planning, Production Planning, Level of Activity Planning-problems on decision making.

Module No. 5: STANDARD COSTING

10 HOURS

Meaning & Definition of Standard Cost and Standard Costing – Advantages & Disadvantages of Standard Costing -preliminaries in establishing system of standard costing- Variance Analysis – Material Variance, Labour Variance and Overheads Variance – Problems on Material Variances and Labor Variances only.

Skill Developments Activities:

- Collect the financial statement of a company and calculate important ratios.
- Collect the annual report of a company and analyse the cash flow statement.
- Prepare a Break-even-chart with imaginary figures.
- Prepare a flexible budget using imaginary figures of at least three levels.
- Draft the chart of various total cost variances.

Name of the Program: Bachelor of Business Administration (BBA) Logistic and Supply Chain Management Course Code: NAME OF THE COURSE: FREIGHT TRANSPORT MANAGEMENT

| COURSE CREDITS | NO. OF HOURS PER WEEK | TOTAL NO. OF TEACHING HOURS |
|----------------|--------------------------|--------------------------------|
| 4 CREDITS | 4 HOURS | 56 HOURS |

Pedagogy: Classroom lectures, tutorials, Group discussion, Seminar, Case studies.

Course Outcomes: On successful completion of the course, the students will be able to:

- a) Understand the different types of transport.
- b) Understand the Transport Economics.
- c) Understand the transport administration.
- d) Understand the terms consolidation, and documentations for Export and Import.
- e) Understand the concept of pricing.

| SYLLABUS: | HOURS |
|------------------------------|-------|
| Module 1: Transport Function | 12 |

Transport functionality - Transport structure and classification - Principles and participants - Transport Service-Traditional carriers, package service, ground package service, Air package service- Intermodal Transportation - Piggyback/TOFC/COFC, Containerships, Non-operating intermediaries; **Modes of Transport** – Rail, Water, Pipeline, Air, Motor Carriers.

Module 2: Transport Economics

The structure of Transport Costs and Location of Economic Activities. Demand for transport. Models of Freight and Passenger Demand. Model Choice; Cost Functions in the Transport Sector. Special Problems of Individuals Modes of Transport; Inter-modal condition in the Indian Situation.

08

10

14

Module 3: Transport Administration

Operations management, Consolidation, Negotiation, Control, Auditing and Claim administration, Logistical Integration.

Module 4: Transport Documentation

Transport documents: Delivery order, Dock receipt, Bill of Lading, Freight Bill, Sea way Bill (SWB/e-SWB), Airway Bill (AWB/e-AWB), shipping guarantee, packing note or list, consignment note - Shipping Manifest.

Export documents: BOL, certificate of origin, commercial invoice, consular documents, destination control statement, Dock receipt, EEI, Export license, Export packing list, Free trade documents, inspection certificate, insurance certificate, shipper's letter of instruction.

| Module 5: Pricing | 12 |
|-------------------|----|
|-------------------|----|

Pricing fundamentals – Fundamentals of Pricing, Principle of Pricing, F.O.B Pricing, Delivered pricing - Pricing issues- potential discrimination, quantity discounts, pick up allowances, promotional pricing, menu pricing- platform service pricing, value added service cost, efficiency incentives.

Skill Development Activities:

- 1. Identify any two products suitable for transportation via Rail, Water, Pipeline, Air, Motor Carriers
- 2. Identify the best modes of transport for textiles and spices from India to USA
- 3. Draft a BOL for shipment of goods
- 4. List out and explain the different kinds of Pricing.

Name of the Program: Bachelor of Business Administration (BBA) Logistic and Supply Chain Management Course Code: BBA 6.4 LSCM 2 NAME OF THE COURSE: SOURCING FOR LOGISTICS AND SUPPLY CHAIN MANAGEMENT

| COURSE CREDITS | NO. OF HOURS PER WEEK | TOTAL NO. OF TEACHING HOURS |
|----------------|--------------------------|--------------------------------|
| 4 CREDITS | 4 HOURS | 56 HOURS |

Pedagogy: Classroom lectures, tutorials, Group discussion, Seminar, Case studies.

Course Outcomes: On successful completion of the course, the students will be able to:

- a) Understand the role of sourcing in logistics and supply chain management, and its impact on overall business performance.
- b) Analyze and evaluate sourcing strategies and decisions, including make-or- buy, insourcing vs. outsourcing, and supplier selection criteria.
- c) Develop effective supplier relationship management skills, including negotiation, communication, and collaboration.
- d) Apply sourcing best practices, including risk management, sustainability, and ethical sourcing.
- e) Evaluate the impact of technology and innovation on sourcing, and apply relevant tools and techniques to optimize sourcing processes and outcomes.

| SYLLABUS: | HOURS | | | |
|---|-------|--|--|--|
| Module 1: Sourcing | 08 | | | |
| Definition. Approaches to sourcing. Sole sourcing – Single, Dual & Multiple sourcing arrangements, other sourcing/purchasing strategies, Tendering – Open, Restricted and Negotiated approaches. Intra–Company trading and Transfer pricing arrangement, Implications of International Sourcing. | | | | |
| Module 2: External Sourcing | 16 | | | |
| Criteria for sourcing requirement from external suppliers – Quality Assurance, Environmental and Sustainability, Technical Capabilities, System Capabilities, Labour Standards, Financial Capabilities. Award criteria – Price, Total Life Cycle Costs, Technical Merit, Added Value Solutions, Systems, and Resources. | | | | |
| Module 3: Assessment of Financial Stability | 12 | | | |
| Sources of information on potential suppliers' Financial performance. Financial reports – Profit & Loss Statements, Balance Sheets, and Cash Flow Statements. Ratio Analysis on Liquidity, Profitability, Gearing and Investment. Role of credit rating agencies. | | | | |
| Module 4: Assessment of Market Data | 12 | | | |
| Analysing Suppliers' Market. Secondary Data on Markets & Suppliers. Indices that measure economic data. Process of obtaining tenders and quotations. Decision criteria for tenders and quotations. Criteria to assess tenders and quotations – use of weighted points system | | | | |

| Module 5: Legislative, Regulatory & Organizational Requirements | 08 |
|---|----|
| | |

Legislative, Regulatory & Organizational Requirements when sourcing from not-for-profit, private and public sector suppliers. Competitive tendering process. Timescales on tendering process. Procedure for award of contract. Regulatory bodies.

Skill Development Activities:

- 1. Highlight the stages when Early Supplier Involvement is encouraged by companies to maximise the benefits
- 2. List out the Regulatory bodies connected to sourcing.
- 3. Identify the benefits of co-location of suppliers to the company.
- 4. List out the Credit rating agencies for supplier assessment.

PROPOSAL- BBA EMBEDDED WITH BUSINESS ANALYTICS

The Business Administration (BBA) Programme offers subjects which are in the form of hard-core, soft-core and open electives. The highlight of the programme is the introduction of internship and certificate programmes. Foundation course, open electives, languages (both English and Second Language), extra-curricular and co-curricular activities are mandatory. Since 2020, the programme outcomes and course structure are in consensus with the New Education Policy, uniformity is maintained in offering the courses.

An innovative programme BBA embedded with Business Analytics is proposed in association with ISDC. The students who opt this programme can undertake the embedded Business Analytics papers in lieu of BBA regular papers as mentioned in the course structure.

| SEMESTER | BBA REGULAR | PAPER IN LIEU OF BBA REGULAR |

BBA EMBEDDED WITH BUSINESS ANALYTICS – 8 SEMESTERS

SEMESTER I

SPREAD SHEET MODELLING

This module will enable the students to learn and start working with MS Excel with regards to Storytelling and Data Visualization. Excel being the most extensive tool used for analysis, this module will equip students with hands-on skills on excel dashboarding and chart creation.

Learning Objectives

To comprehend and employ the use of MS Excel application for analysing, visualizing, and reporting solutions based on business problems and tasks. This module aims at imparting hands-on training towards Data Visualization and Dashboard creation using Excel as well as how to use which formula for which problem scenario. The students will be equipped with the knowledge of various analytical procedures and tools which are available in MS Excel.

Learning Outcomes

Upon successful completion of this module, students should be able to:

• Describe and demonstrate the importance of MS Excel and its functionalities.

- Identify, interpret, and explain the fundamentals concepts pertaining to Data Visualization and Storytelling.
- Design, compose and employ the use of different chart and plots under MS Excel for Dashboard building.
- Create and demonstrate the working of Interactive Dashboards using MS Excel Application.
- Classify different techniques of Reporting, Sharing and Authorizations used in MS Excel with regards to Dashboards.

Unit I

Introduction

Spreadsheet Applications, MS Excel Overview, Advantage and Disadvantages, Introduction to Buzzwords – Dashboards, Reports, Data Visualization, Business Intelligence, Decision Support Systems. Data Visualization, Storytelling and its importance in BI, Visual Perception, Pre-attentive Attributes of Perception, Colour Attributes, High-Precision Judging.

Unit II

Charts and Functions

Tables, Line and Bar Charts, Scatter Charts, Scatter Charts vs Line Charts, Correlation Analysis, Bullet Graphs, Pie Charts, Doughnut Charts, Surface Charts, Radar Charts. Formulas, Help, Operators, Range Operator, Union Operator, Intersection Operator, Conditional Expressions, Boolean Concepts, Filtering and Highlighting, Selecting, Aggregating.

Unit III

Interactive Chart Dashboards

Banded Region Chart, Creating the Chart, Placing the Chart on Dashboard, Dynamic Legend, Creating Endpoints of the Legend, interpolating between Endpoints and Applying Visual Effects, Rollover Method, Conceptual Model, Implementing Hover Table, Conditional Formatting, Designing Pop-ups and making them follow Mouse.

Unit IV

Pivot Table Driven Dashboards

Pivot Table, Four Areas of Pivot Table, Creating Pivot Table, Customizing Pivot Table, Changing Layout, Renaming Fields, Formatting Numbers, Hiding or Showing

Data Items, Sorting, Pivot Charts, Conditional Formatting with Pivot Tables. Form Control Fundamentals.

Unit V

Interactive Interfaces and Reporting

Combo Box Control, List Box Control, Scroll Bar Control, Spinner Control, Checkbox Control, Buttons, Scroll-able Tables, Highlighting Data Points on Charts, Slicers, Formatting Slicers, Protecting Dashboards and Reports, Securing Access to Workbook,

Limiting Access to Specific Worksheet Ranges, Linking Excel to PowerPoint, Distributing Dashboards via PDF, or Web.

SEMESTER II

Python Programming

Module Overview

This module forms an introduction as well an in-depth study in the discipline of Python Programming with regards to Statistical Analysis along with Data Visualization. The module comprises of Python Programming based on Numpy, Pandas and Matplotlib libraries.

Learning Objectives

This course will provide students and exposure towards Python Programming. The students will gain programming knowledge based on important Python libraries such as Numpy, Pandas and Matplotlib.

Learning Outcomes

After the successful completion of this module, students will be able to:

- Elucidate and implement Numpy arrays using Python
- Perform advanced array operations using Numpy library.

- Implement data manipulations and aggregations using Pandas.
- Employ the use of Pandas for Joining, Combining and Reshaping datasets.
- Deploy visual charts and plots based on Matplotlib package and implement geographical mapping based on data points.

Unit I

Introduction to Numpy

Fixed-Type Arrays, Creating Arrays from Python Lists, Creating Arrays from Scratch, Numpy Array Basics, Numpy Array Attributes, Array Indexing, Array Slicing, Reshaping Arrays, Array Concatenation and Splitting, Computation on Numpy Arrays, Aggregations, Fancy Indexing, Sorting Arrays, Numpy Structured Array.

Unit II

Data Manipulation with Pandas – I

Pandas Objects, Pandas Series Objects, Pandas Data Frame Objects, Pandas Index Object, Data Indexing and Selection, Operating on Data in Pandas, Handling Missing Data, Operating on Null Values, Hierarchical Indexing, Indexing and Slicing a Multi-Index, Rearranging Multi-Indices, Data Aggregations and Multi-Indexes.

Unit III

Data Manipulation with Pandas – II

Combining Datasets – Merge and Join, Categories of Joins, Specification of the Merge Key, Specifying Set Arithmetic for Joins, Overlapping Column Names, Aggregation and Grouping, Pivot Tables, Vectorized String Operations, High Performance Pandas functions.

Unit IV

Matplotlib – I

General Matplotlib Tips, Setting Styles, Simple Line Plot and Adjustments, Simple Scatterplots, Visualizing Errors, Basic Error Bars, Continuous Errors, Density and Contour Plots, Visualizing A 3-D Function, Histograms, Binning and Density, Customizing Plot Legends, Colour Bars, Multiple Legends, Subplots, Text and Annotations.

Unit V

Matplotlib – II

Customizing Matplotlib, Configurations and Stylesheets, 3-D Plotting in Matplotlib, 3-D Points and Lines, 3-D Contour Plots, Wireframes and Surface Plots, Surface

Triangulations, Geographic Data with Base-map, Map Projections, Plotting Data on Maps, Seaborn Comparison with Matplotlib.

SEMESTER III STATISTICS WITH R

Module Overview:

The following module comprises of R programming basics and application of several Statistical Techniques using it. The module aims to provide exposure in terms of Statistical Analysis, Hypothesis Testing, Regression and Correlation using R programming language.

Learning Objectives:

The objective of this module to make students exercise the fundamentals of statistical analysis in R environment. They would be able to analysis data for the purpose of exploration using Descriptive and Inferential Statistics. Students will understand Probability and Sampling Distributions and learn the creative application of Linear Regression in multivariate context for predictive purpose.

Learning Outcomes:

After the successful completion of this module, students will be able to:

• Install, Code and Use R Programming Language in R Studio IDE to perform basic tasks on Vectors, Matrices and Data frames.

• Describe key terminologies, concepts and techniques employed in Statistical Analysis.

• Define, Calculate, Implement Probability and Probability Distributions to solve a wide variety of problems.

• Conduct and interpret a variety of Hypothesis Tests to aid Decision Making.

• Understand, Analyse, Interpret Correlation and Regression to analyse the underlying relationships between different variables.

Unit I

Introduction to R Programming

R and R Studio, Logical Arguments, Missing Values, Characters, Factors and Numeric, Help in R, Vector to Matrix, Matrix Access, Data Frames, Data Frame Access, Basic Data Manipulation Techniques, Usage of various apply functions – apply, lapply, sapply and tapply, Outlier's treatment.

Unit II

Descriptive Statistics

Types of Data, Nominal, Ordinal, Scale and Ratio, Measures of Central Tendency, Mean, Mode and Median, Bar Chart, Pie Chart and Box Plot, Measures of Variability, Range, Inter-QuartileRange, Standard Deviation, Skewness and Kurtosis, Histogram, Stem and Leaf Diagram, Standard Error of Mean and Confidence Intervals.

Unit III

Probability

Probability & Sampling Distribution

Experiment, Sample Space and Events, Classical Probability, General Rules Of Addition, Conditional Probability, General Rules For Multiplication, Independent Events, Bayes' Theorem, Discrete Probability Distributions: Binomial, Poisson, Continuous Probability Distribution, Normal Distribution & t-distribution, Sampling Distribution and Central Limit Theorem.

Unit IV

Statistical Inference and Hypothesis Testing Population and Sample,

Null and Alternate Hypothesis, Level of Significance, Type I and Type II Errors, One Sample t Test, Confidence Intervals, One Sample Proportion Test, Paired Sample t Test, Independent Samples t Test, Two Sample Proportion Tests, One Way Analysis of Variance and Chi Square Test.

Unit V Correlation and Regression

Analysis of Relationship, Positive and Negative Correlation, Perfect Correlation, Correlation Matrix, Scatter Plots, Simple Linear Regression, R Square, Adjusted R Square, Testing of Slope, Standard Error of Estimate, Overall Model Fitness, Assumptions of Linear Regression, Multiple Regression, Coefficients of Partial Determination, Durbin Watson Statistics, Variance Inflation Factor.

Semester IV Structured Query Language

Module Overview

In this course, the students will learn the basics of the SQL/No SQL and the Relational Databases. They will learn about the Relational Model and Relational Model concepts and constraints. The students will get exposure to key concepts with regards to SQL Language and DBMS such as Normalization, Transaction Processing along-side an exposure to No SQL programming.

Learning Outcomes

This module will help students gain much needed knowledge pertaining to Relational Database Management Systems, Data Models, SQL query processing, Normalization along with an introduction to No SQL Database systems using Mongo DB.

Learning Objectives

- To understand the basic concepts and the applications of Database Systems.
- To master the basics of SQL and construct queries using SQL.

• To become familiar with the basic issues of Transaction Processing and Concurrency Control.

• To become familiar with NO SQL Programming Language.

• Explain the architecture, define objects, load and query data within No SQL databases.

Unit I

Introduction to Database Management Systems

Introduction-Database System Applications, Purpose of Database Systems, Views of Data, Data Abstraction, Instances and Schemas, Data Models, Database Languages, DDL, DML, Database Architecture, Database Users and Administrators, Database Design, ER Diagrams, Entities, Attributes and Entity Sets, Relationships and Relationship sets, Integrity Constraints, Views.

Unit II

SQL Operators and Relational Theorems

Relational Algebra and Calculus, Selection and Projection, Set Operations, Renaming, Joins, Division, Relational calculus, Tuple Relational Calculus, Domain Relational Calculus, Forms of Basic SQL Query, Nested Queries, Comparison Operators, Aggregate Operators, NULL values, Logical connectives, AND, OR and NOT, Outer Joins, Triggers.

Unit III

Normalization

Problems Caused by Redundancy, Decompositions, Functional Dependencies, Normal Forms, First, Second, Third Normal forms, BCNF, Properties of Decompositions, Loss less Join Decomposition, Dependency Preserving Decomposition, Multi Valued Dependencies, Fourth Normal Form, Join Dependencies, Fifth Normal Form.

Unit IV

Transactions

Transaction Management, Transaction Concept, Transaction State, Implementation of Atomicity and Durability, Concurrent, Executions, Serializability, Recoverability, Implementation of Isolation, testing for serializability, Concurrency Control, Lock, Timestamp Based Protocols, Validation Based Protocols, Recovery, Failure Classification, Storage Structure, Atomicity, Log Based Recovery, Remote Backup Systems.

Unit V

No SQL

Overview of No SQL, Types of No SQL Databases, No SQL Storage Architecture, CRUD Operations in MongoDB, Querying, Modifying and Managing No SQL Databases, Indexing and Ordering, Migrating from RDBMS to No SQL, No SQL in Cloud, Database Administration.

SEMESTER V

SaS and Tableau

Module Overview

This module forms an introduction as well an in-depth study in the discipline of SaS programming with regards to Statistical Analysis along with Data Visualization through Tableau. The module comprises of basic introduction and programming in SaS, using Procedures within SaS and Data Visualization using Tableau application.

Learning Objectives

This course will provide students and exposure towards SaS, Tableau and its usability in the field of analytics. The course comprises of an introduction to SaS, its procedures, visualizations along with Tableau application usage and visualization basics.

Learning Outcomes

After the successful completion of this module, students will be able to:

- Deploy SaS and import data for analysis.
- Prepare and manipulate datasets for analysis in SaS.
- Perform exploratory data analysis within SaS environment using various procedures and functions.
- Understand Tableau Interface, Panes and Implement Visualization Techniques.
- Prepare, Deploy and Publish Stories, Dashboards based on Analytical Cases.

Unit I

Introduction to SaS

Overview of SaS university edition, Deploying SaS Studio on virtual platform, File Management, SaS libraries, importing data, Structure of Data and Data Types, Program Syntax, saving data, PROC IMPORT and PROC CONTENTS, Displaying Data and Generating Logs, List Input.

Unit II

SaS Programming

Variables and Syntax Rules, Data Set Options, Operators, In-File Statement, Input Styles, Select Statements, Leave and Continue, Decision Making via SaS, Where Statement, Looping Constructs, SaS Functions, Arrays and Array Processing, Modifying and Combining Data Sets.

Unit III

SaS Procedures

Proc Data, Proc Sort, Proc Means Sort, Proc Means, Proc Univariate, Proc Freq, Proc Plot, Proc Sgplot, Proc Summary, Proc Contents, Proc Append, Proc Copy, Proc SQL, Proc Delete, Proc Format, Proc Import, Proc Export, Proc Transpose, Proc GChart, Proc GPlot, Proc Report.

Unit IV

Visualization with Tableau – I

Tableau Software Ecosystem, Toolbar Icons, Data Window and Aggregation, Tableau Data Source, Data Extract, Connect to Data, Measure Names, Number of Records & Measures, Heat Maps, Tree maps, Bar Chart, Line Chart, Area Fill Charts, Pie Chart, Scatter Plot, Circle View, Bullet Graph, Packed Bubble, Histogram, Boxplot and Gantt Chart, Sorting Data, Enhancing Views with Filters, Sets, Groups & Hierarchies. **Unit V**

Visualization with Tableau – II

Cross-tabulation, Dashboard Designing, Dashboard Actions, Joining Database, Functions in Tableau, Aggregate Functions, Numeric Functions, Date Functions, Stories, Advanced Mapping, Advanced Parameters, Tableau Best Practices, Combining Multiple Dashboards into Stories, Publishing Stories and Dashboards.

SEMESTER VI

Social Media Analytics

Module Overview

This module comprises of advanced disciplines and units pertaining to Analytics, Data Acquisition via web, Understanding and analysing Unstructured Data along with the future implementations and growth in the discipline of Analytics.

Learning Objectives

This course aims at giving exposure on the advanced aspects with regards to Analytics. The course comprises of Social-Media, Mobile, Text Analytics along with Web Scraping and the future advancements in the field of Analytics.

Learning Outcomes

After the successful completion of this module, students will be able to:

• Apply and use Social Media Analytics for the betterment of the business.

- Use Mobile Analytics for solving complex business problems and to stop churn.
- Evaluate the business problem and apply analytics techniques for better output.
- Analyse and understand patterns and techniques in Social-Media & Mobile Analytics to solve complex problems.
- Understand various improvements and technological innovations relevant to Social-Media Analytics.

Unit I

Overview

Social Media, On-Line Social Network, Off-Line Social Network, Metrics and Measurement, Dashboard, Target Audience, Desired Action, Content, Market Research Online Communities, Cluster Analysis, Conjoint Analysis, Multidimensional Scaling, Social Media Listening, Social Media Scoring, Social Media Modelling.

Unit II

Mobile Analytics

Understanding Mobile Analytics Concepts, difference between Mobile Analytics and Site Analytics, Natural language Processing with Mobile Analytics, Text Mining for Mobile Analytics, Mobile Analytics Tools, Churn Analytics.

Unit III

Text Analytics

Text Data, Sources of Text Data, Information Clusters, Patterns, Trends, Tagging, Natural Learning Process, Lexical Analysis, Social Network Nodes, Linkage Structure, Node Labelling, Content-Based Classification, Word Stemming, Stemming Algorithms, Polarity of the Attitude, Psychological Profiling, Sentiment Analysis.

Unit IV

Web Scraping

Web Scraping of Unstructured Data, Gathering Data from HTTP And HTTPS Format, Web Scraping from XML And JSON File, Regular Expressions, Extraction Strategies, Term Document Matrix, Data Cleansing, Data Manipulation and Data Transformation After Scrapping.

Unit V

Future of Analytics

Introduction to Big Data, Predictive Analysis for Business, Social Information Processing and Distributed Computing, Advances in Machine Learning, Traditional Data Models Evolve, Analytics to Solve Social Problems, Location Based Data Explosion, Data Privacy Backlash, Internet of Things, Artificial Intelligence.

Natural Language Processing

Module Overview

The following module aims to provide an exposure to students based on Natural Language Processing Techniques, Algorithms and Analytics based on Textual Data. The module comprises of NLP basics, Feature Extraction, Relationship Extraction, Text Categorization, Clustering and Topic Modelling Algorithms and Practices.

Learning Objectives

The course introduces the concepts of Text Analytics, Unstructured Information Analysis for better decision making by deriving valuable insights. The course will help the students understand the roots behind Text Mining which evolved from Machine Learning, Natural Language Processing and Statistics. Upon completion, students are expected to be able to describe basic concepts and methods of Text Mining, Information Extraction, Text Classification and Clustering, Topic Modelling.

Learning Outcomes

After the successful completion of this module, students will be able to:

- Understand approaches to Syntax and Semantics in NLP.
- Understand various methods for Statistical approaches to Machine Translation.
- Build Models which extract information from Textual Unstructured Data.
- Understand and implement Topic Modelling and Probabilistic Models for Information Extraction.

• Implement and deploy programs based on Relationship Extraction, POS Tagging and Clustering Algorithms based on NLP.

Unit I

Introduction to Text Mining

Basics of Text Mining, Natural Language Content Analysis, Core Text Mining Operations, Associations, Using Background Knowledge for Text Mining, Domain Ontologies, Domain Lexicons. Text Mining Pre-processing Techniques, Task Oriented Approaches, NLP Tasks, Tokenization, Part-of-Speech Tagging, Syntactical Parsing and Shallow Parsing.

Unit II

Extracting Features, Relations from Text

Finding Implicit Features, Finding Opinion Phrases and their Polarity, Context-Specific Word Semantic Orientation, Analysis of Word and Document Frequency, tf-idf, Zipf's Law, bind tf_idf Function, Subsequence Kernels for Relation Extraction, Capturing Relation Patterns with a String Kernel.

Unit III

Text Categorization and Clustering

Applications of Text Categorization, Document Representation, Knowledge Engineering Approach to Text Categorization, Machine Learning Approach to Text Categorization, Evaluation of Text Classifiers. Clustering Tasks in Text Analysis, Clustering Algorithms and Clustering of Textual Data.

Unit IV

Relationships between Words

Tokenizing by N-gram, Counting and Filtering N-gram, Analysing Bigrams to provide Context in Sentiment Analysis, visualizing a Network of Bigrams using ggraph, Counting and Correlating Pairs of Words with the widyr Package, Counting and Correlating among Sections, Examining Pairwise Correlation.

Unit V

Topic Modelling and Probabilistic Models for Information Extraction

Latent Dirichlet Allocation, Word Topic Probabilities, Per-Document Classification, By-words Assignments, Alternative LDA Implementations. Hidden Markov models, Stochastic Context Free Grammar, Conditional Random fields, Parallel Learning Algorithms.

SEMESTER VII

Machine Learning and Artificial Intelligence

Module Overview

This module comprises of conceptual, statistical and Machine Learning algorithms. It covers all the necessary models pertaining to Machine Learning such as Regression, Decision Trees, Support Vectors, Clustering, Association Analysis and Dimensionality Reduction.

Learning Objectives

After this course students will gain critical knowledge and understanding about major Data Mining procedures like Decision Tree, Cluster Analysis, Neural Networks, Support Vector Machine, Bayesian Networks and Machine Learning fundamentals. Students will be able to apply and practice this gained knowledge in variety of Business Scenarios.

Learning Outcomes

Upon successful completion of this module, students should be able to:

- Understand and employ a wide variety of Statistical and Machine Learning Algorithms.
- Identify the characteristics of Datasets, Problem Statement and develop Machine Learning programs with reference to known Computing Techniques.
- Understand the Model Performance Evaluation and select the best one based on the solution.
- Implement Machine Learning techniques and the Programming Framework to obtain acceptable decisions for the Real-World problems.

Unit I

Classification and Regression Tree

Classification & Regression, working of a Decision Tree, Attribute Selection Measures, Information Gain, Gain Ratio, Gini Index, Building Decision Trees, CART, C5.0, and CHAID Trees, Prediction by Decision Tree, Advantages and Disadvantages of Decision Trees, Model Overfitting, Building Decision Trees in R.

Unit II

Clustering

Cluster Analysis versus Factor Analysis, Overview of Basic Clustering Methods, Agglomerative Hierarchical Clustering, Within-Group Linkage, Nearest Neighbour or Single Linkage, Furthest Neighbour or Complete Linkage, Centroid Clustering, Ward's Method, K-Means Algorithm, Dendrogram, Profiling of Cluster, Cluster Evaluation.

Unit III

Support Vector Machine

Decision Boundaries for Support Vector Machine, Maximum Margin Hyperplanes, Structural Risk Minimization, Linear SVM-Separable Case, Linear SVM-Non-Separable Case, Kernel Function, Kernel Trick, Kernel Hilbert Space, Model Evaluation.

Unit IV

Market Basket Analysis

Market Basket Analysis and Association Analysis, Market Basket Data, Stores, Customers, Orders, Items, Order Characteristics, Product Popularity, Tracking Marketing Interventions, Association Rules, Support, Confidence, Lift, Chi-Square Value, Sequential Pattern Analysis.

Unit V

Introduction to Artificial Intelligence

Current Trends in AI, Intelligent Agents, Environments, Problem Solving Agents, Searching Techniques, Knowledge and Reasoning in AI, Forms of Learning, Structure of a Neural Network, Analogy with Biological Neural Network, Activation Functions, Gradient Descent, Model Accuracy.

SEMESTER VIII

Big Data Analytics

Module Overview

This module forms an introduction as well an in-depth study in the field of Big Data and Hadoop. It comprises of the fundamentals as well as advanced topics needed to progress in this technology. The students will learn about the applications, usage and several use case scenarios pertaining to Big Data- Hadoop where they can use the knowledge and progress ahead.

Learning Objectives

This course will help students gain knowledge and understanding about Big Data Technology, Hadoop Ecosystem and various tools related to it. The students will learn about the HDFS File System, Map Reduce Framework, analysing data using Hbase and Hive along with the Integration of R with Hadoop.

Learning Outcomes

Upon successful completion of this module, students should be able to:

- Understand the fundamentals of Big Data and its Applications in various Domains.
- Conceptualize and Incorporate the Technologies behind Big Data.
- Understand HDFS File Structure, Map Reduce Framework, the architectures related to them and to use them to solve complex problems.
- Integrate R with Hadoop and solve analytical problems.

• Understand and Use Hive/Hbase shell pertaining to relational data handling under Hadoop.

Unit I

Introduction to Big Data

What Is Big Data? History of Data Management, Evolution of Big Data, Structuring of Big Data, Elements of Big Data, Application of Big Data in the Business Context, Careers in Big Data. Business Applications of Big Data: The Significance of Social Network Data, Financial Fraud and Big Data, Fraud Detection in Insurance, Use of Big Data in the Retail Industry.

Unit II

Technologies for Handling Big Data

Distributed and Parallel Computing for Big Data, Understanding Hadoop, Cloud Computing, Grid Computing and In-Memory Technology for Big Data. VMWare Installation of Hadoop, Linux and its Shell Commands, Different Hadoop Distributions and their advantages, Hortonworks, Cloudera, MapR.

Unit III

Understanding the Hadoop Ecosystem

The Hadoop Ecosystem, Storing Data with HDFS, Design of HDFS, HDFS Concepts, Command Line Interface to HDFS, Hadoop File Systems, Java Interface to Hadoop, Anatomy of a file read, Anatomy of a file write, Replica placement and Coherency Model. Parallel Copying with distcp, keeping an HDFS Cluster Balanced.

Unit IV

Map Reduce Fundamentals

Origins of Map Reduce, How Map Reduce Works, Optimization Techniques for Map Reduce Jobs, Applications of Map Reduce, Java Map Reduce classes (new API), Data flow, combiner functions, running a distributed Map Reduce Job. Configuration API, setting up the development environment, Managing Configuration.

Unit V

Hive, Hbase and R-Hadoop

Understanding R-Hadoop, Integration Procedure, Packages needed for R under Hadoop Ecosystem, Text Mining for Deriving Useful Information using R within Hadoop, Introduction to Hive & Hbase, Hive and Hbase Architecture, Understanding Queries, Mining Big Data with Hive & Hbase.

Proposed Question Paper Pattern for Internal Examination Bachelor of Business Administration (BBA)

(DSCC) AND (OE)

Course Code: Name of the Course

Duration: 1.5 Hours

Total Marks:50

PART -A

| Answer any FIVE of the following: | | 5X2 =10 |
|-----------------------------------|----------------------------------|----------|
| 1. | | |
| 2. | | |
| 3. | | |
| 4. | | |
| 5. | | |
| 6. | | |
| 7. | | |
| 8. | PART - B | |
| | Answer any TWO of the following: | 2X5 =10 |
| 9. | | |
| 10. | | |
| 11. | | |
| 12. | PART - C | |
| | Answer any TWO of the following: | 2X15 =30 |
| 13. | | |
| 14. | | |
| 15. | | |
| 16. | | |
| | ***** | |

Semester End Examination Bachelor of Business Administration (BBA) Course Code: Name of the Course

DSCC

Duration:2.5 Hours

Total Marks: 60

PART -A

| | Answer any FIVE of the following: | 5X2 =10 |
|-----|-----------------------------------|----------|
| 1. | | |
| 2. | | |
| 3. | | |
| 4. | | |
| 5. | | |
| 6. | | |
| 7. | | |
| 8. | PART - B | |
| | Answer any FOUR of the following: | 4X5 =20 |
| 9. | | |
| 10. | | |
| 11. | | |
| 12. | | |
| 13. | | |
| 14. | | |
