Course Description

The **Insurance and Principles of Insurance** course introduces students to the concept and history of insurance, its policies and its role. It covers key principles and legal frameworks of insurance contracts, focusing on life and general insurance. Students will learn how insurance operates as a business, including various products like life, fire, marine, motor, and liability insurance. The course will explore processes like underwriting, policy issuance, claims handling, and the importance of insurance. **Ms. Daphny Maria Sankar** is an ICAI Insurance Officer (C) of India and a key general insurance practitioner with a rich experience in underwriting and premium processing.
